Guide to Modding and Custom PC'sBy Mr. EcclectikatBuilding Extreme PCs: The Complete Guide to Modding and Custom PCs is a great guide for the novice venturing into building your first computer mod project. Though not as in-depth on how to mod your computer, but informative in supplying insights and tips on the basics of the early steps to take. Filled with information from the type of processor to purchase, to the suggestions on the best keyboard and mouse, it gives handy information in plan talk about the process. In addition, the chapter on Showcases shows in vivid pictures some really cool finished mods. I recommend this guide for the beginner who is tired of the look of your regular boxed unit, and wanting to venture into building a dream system.0 of 0 people found the following review helpful. Imaginative ContentBy Daren L. CavalliereA unique book with some innovative ideas to get the creative juices flowing. A slight bit outdated (2005) but still a good book regardless0 of 0 people found the following review helpful. old and out datedBy Memphis TNI bought this as a stocking stuffer for my hubby who is in to building computers, me I know nothing about them, all the ideas were out

dated and products even more so.

The bland beige box is dead. Fueled by a passion for performance and an eye for style, a new breed of PC user is taking matters into its own hands. Combining cutting-edge components with the latest trends in system design, they're turning the standard personal computer into a high-speed work of art. *Building Extreme PCs* is the ultimate guide to the world of PC modification and customization. Both a showcase and a DIY handbook, it goes in-depth into system building, overclocking, cooling, and modification, reveals the secrets of optimization and benchmarking, then moves on to cover some of the most exciting and inspirational custombuilt systems around. From silent systems to multi-processor monsters, from gaming powerhouses to neon-lit speed machines, this book has it all, complete with guidance from the people who made them.
