It provides the answers to so many questions that are fun, interesting, and occasionally- historical! The outline of the book is fairly simple. The question (sometimes silly, sometimes intriguing) is posed as a heading, and then there is a quick but detailed answer. These answers are a few paragraphs to a little over a page. The answers are concise but completely filled with great information. The title of the book suggests that all the questions might be crude or overly silly, but thats not it at all! Although some of the questions are silly (for example besides the title, why dont birds fall off branches when theyre asleep or why do dogs have wet noses), there are so many more kinds of questions in this book! Some of them are vaguely scientific (such as, what causes Parkinsons Disease or how does general anesthesia work), while others are historical (such as, how did Mothers Day originate). Although they are so different, all these questions are really interesting, with compelling answers and well-researched responses. I really enjoy this book. I expect its usually used as a bathroom reader but I read it all in one sitting! Its so much fun, and I learned a lot!3 of 3 people found the following review helpful. Perfect for at Home or on the Go!By ZaabaaAs my age increases I've been finding myself spending more and more time in the 'home office.' As such my needs for enjoyable, but appropriate, literature has also increased. I look for books that contain cool facts, hard questions, and a condensed easy to read form. Enter "Can Holding in a Fart Kill You?" This book is absolutely jam packed with intriguing questions or musings on life such as 'What does Trainspotting Involve?' (What is trainspotting?) and 'Why is the Empire State Building Famous?' (Because it's big?).Each question is given 3-6 paragraphs of detailed information which not only answers the questions but expands it to larger concepts and ideas that can help !you! in life. But really, this book is hard to put down and is full of fun information which is presented in a concise and clear manner which I enjoyed reading. Heck, sometimes I even find myself taking it to the work home office for my afternoon reading pleasure.1 of 1 people found the following review helpful. Good addition to a trivia library (and A+ bathroom book)By britt kellerI have a soft spot for trivia books--things like Ever Wonder Why? and Uncle Johns bathroom readers. Recently, I've liked What If? and the ASAP Science books. This one was a little less science-y than those, which I liked. It was fun to have a range of topics, everything from stuff I was genuinely curious about (What are the health risks of cell phones? How harmful is secondhand smoke?) to more lighthearteded fun ones, like is Jurassic Park possible? and the title question.....which you'll be glad to know is no. There's also how is a safe cracked, if you want some real world advice ;)The author has a a relaxed writing style and it's fairly easy to read, so it would also be a good book for kids.I bought this as a cheap ebook to have something light to read on a vacation, but I think I'll buy the paperback to keep in the bathroom.

MORE THAN 200 FUN FACTS FROM BAFFLING AND BIZARRE TO ENTERTAINING AND

ENLIGHTENINGThis curious, captivating collection of trivia will surprise and intrigue readers with amazing answers to questions like: Is Jurassic Park possible?What causes the shakes after drinking a lot of alcohol?Why do dogs walk in circles before lying down?What makes popcorn pop?
