Danny Gowler : Carnival Games - How They Work and How to Win before purchasing it in order to gage whether or not it would be worth my time, and all praised Carnival Games - How They Work and How to Win:

4 of 4 people found the following review helpful. There are no shortcuts, it's all practice!By Victor I. PoonI bought this book and 2 others "The Secret of Amusement Park Games Revealed" and "How To Win at Carnival Games" because I was curious to see what was in them. They ALL give you some general idea of how to go about winning some of the games but in essence, it takes lots of practice and perhaps building your own version of it at home. Let's face it, the carnies make their living from people walking up who think that they can win. The odds are on their side and as long as you believe that "it's just a lot of fun to try", you're on the right track. You can and will spend a lot of money chasing those large stuffed animals if you think these books will make you win. That's my 2 cents. :-))11 of 11 people found the following review helpful. Beat the games!By Jeff GrudenI've tried to figure these games out forever. I can't tell you how much money I've spent. This book helped me figure them out. The author told you what he knew

and was straight forward on your chances of winning. He tells how the games are won and how they can be adjusted to make it harder. I thought it was great when the author said like "If you can't get it in x tries, walk away." It covered almost all of the games at some of the big amusement parks. If you need an help on your technique this is the book for you.....8 of 13 people found the following review helpful. I thought I could never win until now!By Kathy CarlsonFor years I have been trying to win at carnival games. This book made it happen! Also, cleverly written for enjoyable reading.

SECRETS to 38 of the most popular carnival games are exposed. Includes detailed instructions and illustrations on how to win games like Milk Can, Bushel Basket, Stop Sign, Darts, Ring the Bottle, Milk Bottles, Rope Ladder, Bottle Stand Up, Cover the Spot, and many more. Teaches you which games you should play to win THE BIG PRIZES as well as which games to stay away from.

From the PublisherThis is a full-sized, information packed, easy to read book containing over 90 full-color illustrations. The cover is a wrap around photograph of just a small portion of the Author's actual winnings. Recommended for all readers 12 years and older.About the AuthorDanny Gowler has spent many years compiling this information that "Carnys" don't want you to know about. He is frequently accused of being a "Carny" when he wins games so easily using his methods. It is not uncommon for him to be offered money for his prizes by people who cannot win for themselves.Excerpt. Reprinted by permission. All rights reserved.From Preface: This book deals with "carnival games", which, with very few exceptions, are possible to win, therefore legal, but you have to learn how to win. Keep in mind, however, that the primary purpose of these games is to separate you from your money, legally. If you don't believe me, just ask any carnival game operator if the reason that he is trying to get you to play his game is just so he can give his prizes away. Now that you understand the simple motivation of your opponent, you should just accept it and learn how to deal with it.
