Except for a few in the back I find the puzzles much too easy to be enjoyable. I've been doing Sudoku puzzles for a while now and enjoy a challenge - the Will Shortz books provide a good range from easy to difficult although, in my experience, his puzzles aren't always accurately graded (occasionally a more difficult puzzle in the easier section and vice versa). I will have to keep searching for a Sudoku book that satisfies my criteria. Any suggestions? 0 of 0 people found the following review helpful. Five

StarsBy Eduardo GuimaraesAnother very nice sudoku book, puzzles you can solve without having to be a top notch expert.0 of 0 people found the following review helpful. I especially like this Carol Vorderman's sudoku bookBy Annie53I especially like this Carol Vorderman's sudoku book. On each of the puzzles in this book you time yourself and record the time and points. Carol also has the time it took her to do some of the puzzles. I like trying to beat her time.
