Dunn On the one hand, the guide seems to have very nearly all the information needed to progress in the game. It uses sketch maps with screenshots only of selected areas. (They did not attempt to do a screenshot of every square inch). On the other hand, you often have to look in multiple places before you find the part of the guide you need. It seems to be based on the assumption that the user will use it continuously as he plays, rather than as a checklist of items, and rather than as a tool when stuck. Every enemy gets a box with a drawing and a few sentences of text regardless even though figuring out how to kill enemies is not the main source of the challenge. Even with the guide, you won't be able to get every single item-- in some cases, an item is simply indicated by a number corresponding to a key. 0 of 0 people found the following review helpful.
