Hugh Kelsey : Challenge Match before purchasing it in order to gage whether or not it would be worth my time, and all praised Challenge Match:

In this book H W Kelsey continues with the formula that proved successful in Test Your Match Play, The Tough Game and The Needle Match. The setting is subtly changed, for you are not playing a Gold Cup final this time. Your deadly rivals, still convinced that they are the better team, have challenged you to a grand show-down over sixty-four boards, the losers to contribute 1000 pounds to the charity of the winners' choice. Naturally you cannot ignore such insolence. The South seat is yours throughout the match and the result is in your hands. You are faced with a difficult problem in play or defense on every board, and it will take all your skill and resolution to come out on top. Win or lose, you are sure to enjoy the challenge and to profit from the lessons of the hand.
