By Richard DeWald This delightful, short, optimistic well-illustrated collection of infographics is an unusually rewarding diversion for a moment while sipping a cup of coffee. I confess that I came to it as a fan of her website, but Ms. Iwata has done more than just copy-and-paste from/about her Internet publishing; the book is thoughtfully sequenced to lead the reader through a short, happy, informative journey through what she's discovered about coffee. It is as if you were having coffee with the author, she got there early, pounded a couple of double-espessos while waiting, and has a lot to tell you. You, the reader, can just sit there, amused and content, while she goes on about coffee's history, origins, patterns of consumption, effects on the body and mind. Will it change your life? Paying attention to your life the way Ms. Iwata pays attention to coffee will. When I know as much about what I enjoy, use and consume daily as the author does about coffee I am more content and find like more interesting. If you drink coffee every day like I do, buy this

little book and read it. The trusty cup of joe will speak to you in new ways every day from then on. Drink coffee, be happy. 3 of 3 people found the following review helpful. A fun, witty book about the world's second favorite beverage. By Christopher Barrett If you aren't trying to take this book too seriously, then you'll have a blast. Mathew Inman (aka The Oatmeal) illustrates much of this book. It has a lot of fun infographics and charts but it is not a reference book. For that you would want to read 'Uncommon Grounds' all 800+ pages. For a 100 page, cutely drawn, fun little 'coffee table' book this is a winner. It's selling for under \$10 and well worth it. 2 of 2 people found the following review helpful. but it's great to have it in a book form to casually ... By Diyeana I received this book today and I can't wait to take it to the office to share. Yes, a lot of the content is also on her website, but it's great to have it in a book form to casually (or, as in my case, quickly) read when you want an internet break. I'm so glad I'm a black and espresso coffee drinker but I think even if you drink soy or more-sugar-than-coffee drinks, you'll get a kick out of the book. If we can't laugh at ourselves (I am obviously going to die from a sharp and bitter soul) then we need serious help. Have some coffee and read a coffee table book! It will help.
