RatcliffeTracing all films released in 1988, Volume 40 in this series just builds to another 'must-have' for any film buff. An excellent resource for those who may have missed a films of interest, this, like all of the other volumes gives us enough information about that year. "Rainman" was one of my favorites of that year, as was "The Accused", including one of Jodie Foster's best performances.Like I mentioned previously, this is one of the best resource books available for any movie buff, as are the previous volumes in this series.0 of 0 people found the following review helpful.
