It is published once a year which makes it a collector item. I have bought an edition every year since 1972!! I guess I have a valuable collection. If these books are sold in bookstores you couldn't prove it to me. I have always had to buy them online. This is supposed to be a review of volume 52. The problem is these books go out of print almost as soon as they are published. Volume 52 is great, however I seriously doubt there is even one copy available. My suggestion, go to .com and order this years edition and then do so each year in the future as long as you love movies.Hope this was helpful. Sincerely Richard G. AT AGE 52, STILL THE ONEBy Anthony McGillStill the best of its kind (and probably unique) in its field, Screen World #52 bounces along with its usual thorough listing of the year's releases, in this case the films of

2000. This volume continues in its expanded format which began with Volume 45, being more than an inch wider than previous editions ending with the 1993 one. Whereas earlier volumes were more compact, this bigger version does allow more scope with reproduction of stills, although quality could be improved on, and information. And the more than a hundred extra pages when compared to the older editions allows more coverage especially in the biographical data and obituary sections. To those dedicated readers who have been collecting this annual each for years, this edition won't disappoint with its comprehensive coverage of the film year. A season which included "Gladiator", "Billy Elliot", "Wonder Boys", "Erin Brockovich", "Crouching Tiger, Hidden Dragon", "You Can Count on Me", "Pollock" and "Traffic".

(Screen World). John Willis' Screen World has become the definitive reference for any film library. Each volume includes every significant U.S. and international film released during that year as well as complete filmographies, capsule plot summaries, cast and characters, credits, production company, month released, rating, and running time. You'll also find biographical entries a prices reference for over 2,000 living stars, including real name, school, place and date of birth. A comprehensive index makes this the finest film publication that any film lover could own.
