**Jason Surrell : Screenplay by Disney** before purchasing it in order to gage whether or not it would be worth my time, and all praised Screenplay by Disney:

Disney's imaginative storytellers offer guidance and techniques to help aspiring screenwriters add Disney magic to their movie ideas. From Snow White and the Seven Dwarfs to Bambi, from The Little Mermaid to The Lion King, the animated films created by The Walt Disney Company are renowned for stories that amuse, astound, and inspire the viewer. Now, for the first time, the story artists and screenwriters behind these beloved movies offer aspiring and

professional screenwriters a chance to learn how to incorporate the magic of Disney into their own celluloid dreams. Thanks to its three-act structure, *Screenplay by Disney* demonstrates the process of creating a great screenplay from start to finish. Additionally, a stellar cast of contributors will reveal not only how Disney does what it does so well but how you can adapt the company's strategies to your own creative endeavors.
