Emails can actually be WORTH reading??By Stephanie DrummondOk, so everyone deals with email daily for whatever reason...and most people I know do admitt they are helpful, they can also be ridiculous sometimes right? So meet Scott Neumann. This book is a composite of responses that "Scott Neumann" wrote to people on many different hilarious topics just to get a response and boy, did he ever! I

can't believe people actually spent time on their computer giving "Scott Neumann" a serious reply. Lane Strauss is creative in where he sent our these emails and decided to publish them for our laughter. This book will make you smile and wonder what people are thinking when they log onto their emails and click on "reply". Definitely a book for the information highway. 5 of 6 people found the following review helpful. funniest book i've ever written...i mean, read. By Lane Strauss i found myself hanging on every word...every syllable of every word...every vowel of every syllable of every word--including y. this truly is a masterpiece of epic proportions. if i had to describe the author in one word, i guess i'd have to say...really handsome.

Imagine e-mailing a priest asking for spiritual guidance and support because you had killed thousands of bugs on your windshield one muggy summer night. Or e-mailing a cigarette shop asking if they would like to carry a new line of cigarettes that grow longer as you smoke them. Or e-mailing a detective agent asking for help because you had reason to believe that someone was stealing your front lawn. Well, someone didnt just imagine it. They actually had the stupidity to do it. Thats Sincerely, Scott Neumann, a compilation of dozens of vitally important e-mails and their responses from all over world. From large corporations, to dream analysts, to porn site webmasters, Scott Neumann has many, many issues on his mind, and thanks to e-mail, he can now get his answers quickly, safely and in the privacy of his own modem. Sincerely, Scott Neumann is a book that anyone with a computer and half a brain can relate to. Not necessarily in that order.

About the Author After shattering his parents dreams of having a nice Jewish attorney as a son, Lane Strauss has spent a dozen years writing copy at advertising agencies in Cleveland. His parents still hope that one day hell reconsider and go back to law school. Or medical school, one of the two.
