Bryan Singer, Michael Dougherty, Dan Harris : Superman Returns: The Complete Shooting Script before purchasing it in order to gage whether or not it would be worth my time, and all praised Superman Returns: The Complete Shooting Script:

0 of 0 people found the following review helpful. supermanBy big edgood book0 of 0 people found the following review helpful. GreatBy SK T-SMy movie loving nephew loved this gift! It was a great way for him to be exposed to different mediums of literature.3 of 12 people found the following review helpful. One of the best!By Joecooler2uI

saw the movie first in Imax 3-D and it was amazing! This script by Bryan Singer is spectacular. The only downside for me (for the movie script) was the character of Kitty (Lex's dumb girlfriend). Parker Posey is annoying at best. Her only role I liked was in Scream 3. As for the character of Kitty, expect someone shallow, annoying completely not needed in this story (or movie). Overall, though, Superman Returns is one of the best scripts for comic book movies out there. You can tell there is a lot of love and insight into the character of Superman. Unfortunately they treat Clark Kent as a disguise only, unlike Smallville where Clark is the real him and Superman will be the disguise. The plot is a little out there. Lex wants to get his share of money from the world by creating basically a new Krypton on earth. When Lois says (quote from memory, might be off a little) "but it will kill millions" Lex responds "Wrong. Billions!" well who's going to pay to live on this land if billions die? For an evil genius this is Lex's dumbest comments. Sure he is supposed to have a downfall so Superman can beat him, but something so simple should have been better thought out. Otherwise, the script is very well done. Even if you don't see the movie first, it is a quick read and well worth the buy.

The Man of Steel returns to Earth after a mysterious absence of several years, only to find that Lois Lane has moved on with her life, and old enemy Lex Luthor is plotting to render Superman powerless once and for all!

About the Author Bryan L. Singer, CISSP, CAP, (Montevallo, AL) is an industry-recognized industrial security expert currently in the position of Principal Investigator with Kenexis Security Corporation, specializing primarily in industrial control systems and SCADA security. Bryan began his professional career with the U.S. Army as a paratrooper and intelligence analyst. Since fulfillment of his military service, Bryan has designed, developed, and implemented large scale industrial networks, cybersecurity architectures, and conducted penetration tests and cybersecurity assessments worldwide across various critical infrastructure fields including power, oil and gas, food and beverage, nuclear, automotive, chemical, and pharmaceutical operations. In 2002, Bryan became the founding chairman of the ISA-99/62443 standard, which he led up until 2012. His areas of technical expertise are in software development, reverse engineering, forensics, network design, penetration testing, and cybersecurity vulnerability assessments. He is a published author as well as frequent speaker and contributor to the ICS security field.
