After 3 weeks of casual study I passed the Technician, General, and Extra in one setting. I copied and then went through the pool of test questions included in the back of each book with a highlighter. Blue for the questions I 100% knew, green for the questions that I got with a little intuition (guessing not allowed), and yellow for the questions I did not understand. Each question in the pool has the section and page number listed making it easy to refer back to the section for further study. I went through all of my "greens" and then the "yellows" reading the relevant sections. Using this process with a clean copy of the pool questions I got to mostly "blue" and a couple of "greens"...and easily passed the three test. I also took the practice tests on the ARRL and the AA9PW dot com web sites.10 of 11 people found the following review helpful. Well laid out, with a glossary in the back of the book and the answers to ALL of the test questions. Since this is the spiral bound edition, it lays flat on the table, which makes it easy to read.
