Better than expected...By NeplusultraI took into account the previous review before I bought this book, but I enjoyed the other books in the series, so I thought I would give it a fair chance.I always appreciate when someone takes the time to write a review share their opinion, but the previous review leaves me a bit confused.I just don't see what the big gripe was about this book.I am an accomplished martial artist I enjoy learning from any source that deepens my understanding of this wonderful art.To me, this book, like the others by this author, offers a wealth of knowledge.This book is a nice addition to my martial arts library.0 of 0 people found the following review

"Without a doubt the best works on martial arts today are those written by Marc Tedeschi...Marc has put himself in a class by himself as the author of martial arts books, from his knowledge and understanding of the arts to his presentation...great reference for anyone who is serious about learning or teaching the martial arts."
