**Robert Kaplan, Ellen Kaplan : The Art of the Infinite: Our Lost Language of Numbers** before purchasing it in order to gage whether or not it would be worth my time, and all praised The Art of the Infinite: Our Lost Language of Numbers:

1 of 1 people found the following review helpful. Five Stars By Biped The Kaplans write hugely entertaining and enlightening books on math. 0 of 0 people found the following review helpful. A good book by professors with a wonderful writing style By James W. Killman You can follow most of the math discussion without be a degreed

mathematician, and there are some very surprising discoveries. A good book by professors with a wonderful writing style. 1 of 1 people found the following review helpful. Fun math patterns By Ben Casual reading. Fun math patterns. But sometimes the author is a little more poetic than he should be.

It is easy to be wary of mathematics - but as this book shows, drawing on science, literature and philosophy, its patterns are everywhere. In witty and eloquent prose, Robert and Ellen Kaplan take mathematics back to its estranged audience, bringing understanding and clarity to a traditionally difficult subject, and revealing the beauty behind the equations. Only by letting loose our curiosity can we learn to appreciate the wonder that can be found in mathematics - an 'art' invented by humans, which is also timeless.

About the Author Co-authors Robert and Ellen Kaplan are husband and wife. Robert Kaplan has taught mathematics (most recently at Harvard University). He also taught Greek, German, Sanskrit and inspired guessing. In addition to teaching mathematics at Harvard University, Ellen Kaplan has taught history, Latin and biology. Together they have founded The Math Circle, a school for the enjoyment of pure mathematics.
