Great adventure of a team of players out to beat the casino!By Silicon Valley GuyBack in the late 70's and early 80's, Ken Uston was the king of blackjack. The Big Player is a story of his adventures where he gets recruited into a team of card counters to play and win blackjack against the casinos. This book does not present any card counting systems. It is a book about the stories he had after going up against the casinos.He had a wild ride and discusses the never ending battle between his teams and the casinos. How they'd get barred, different tactics and strategies they used, team play, etc.If you are interested in card counting of blackjack, you'll love this story.

This is a reprint of the famous book, The Big Player, mentioned on the History Channel and news reports showing how a team of blackjack players made millions of dollars at the expense of Las Vegas Casinos. The original book accurately explained what Ken Uston and his teams did, but it did not explain exactly how they did it. Thus, the reader

of the original book learned little or nothing about how to replicate the experiences of his teams. Now that Ken is no longer with us, one of the surviving members of his teams reveals for the first time herein exactly how Ken Uston was able to accomplish what he did, including the exact card counting methods used, which are NOT the methods described in Beat the Dealer, how Ken Uston and his teams managed to avoid detection, the pitfalls and problems they encountered in the casinos and why the team eventually broke up. The original book has been updated with technical information by team member Roy Hoppe explaining how the team and card counting systems worked. Roy Hoppe is a rated chess master and a professional bridge player. He was a professional blackjack player until he "retired" from the game for reasons explained in this book.
