Mark Burrows : The Body Electric: A Symphony of Sounds for Body Percussion (Grades 2-6, CD Included) before purchasing it in order to gauge whether or not it would be worth my time, and all praised The Body Electric: A Symphony of Sounds for Body Percussion (Grades 2-6, CD Included):

"The Body Electric" celebrates the music inside us while exploring ways to express this music using the greatest instruments of all-our bodies. Part handy reference, part idea-generator, this collection is all fun as it introduces a self-contained instrumentarium that is convenient, inexpensive, physical, adaptable, self-affirming, educational, and, most

of all, fun. An overview of and targeted examples for a variety of body, vocal and mouth sounds are included within the first two sections; great to teach the basics and to help student internalize rhythmic concepts. The last section includes songs that employ various combinations of all the introduced sounds. Reproducible student parts are included, as is a CD with helpful performance models of the sounds and pieces.
