You must have seen the advertisements, written by the teacher of . Then the book contain some strange technique. That stuff is a road to nowhere. To learn to sing: Learn to play an instrument that you can play chords on (piano is best). Find out about ear training and work at it (and I don't mean some bogus "perfect pitch" course.) Get this book and study it. Find a teacher who's training is

consistent with this book. This is from Berklee Press and Berklee College of Music has produced some of the world's best contemporary musicians. This book would not have made it out the door if it had not had good reviews from some of the best. Also get Vocal Workouts for the Contemporary Singer and do the exercises contained within. Trust Berklee, they know what they are teaching. 2 of 2 people found the following review helpful. Best buy ever! By Jesus Toribio I'm really excited about this book, it is so detailed, so scientific, so didactic. It's one of the best music methods I've bought by so far. 3 of 3 people found the following review helpful. Just Amazing!! By Lucas Lima - Voice Teacher I was looking for a complete guide to use in my classes. Something that would help me teaching my students the whole issue about voice. This book surprisingly provided everything I needed. Deep information about a plenty of voice issues (register, resonance, breath, vocal health, diction, performance, anatomy, etc), exercises for different levels and voice types accompanied by a CD. The last tracks are examples of some issues discussed during the book. You can read about a technique and then play the CD and listen to someone applying that technique to one's voice. That's simply amazing. It's like having Anne Peckham in your room to a private class. The writing is easy to understand. You won't have a hard time understanding all those difficult and technical names. Although you are provided with good information. I highly recommend this book to anyone interested in learning a lot about voice. For teachers seeking for a method or even students looking for some good vocalise and voice information.
